

Jeff Barton

Executive Consultant

Jeff Barton is an Executive Consultant in the Information Technology Practice at Global Vision Group. He has an extensive track record of successfully developing key business strategies and translating them into pragmatic implementations. Jeff's combination of skills and 35 years of consulting expertise has ensured successful project completions in transaction and payment processing, data communications strategy, procurement management, operational reviews, process improvement, fraud management, electronic trading, systems integration, and applications development. He has managed a series of global projects focusing on Visa commercial card enhanced data strategy and the design and development of a processing platform to underpin multinational data consolidation and reporting, lodge card matching, data warehousing and reporting, and the flow of XML invoicing across the T&E sector. For GVGroup, Jeff helped develop the strategy and business case for, and then project managed a team of 140 internal staff and external suppliers, to implement a multi-currency, multi-language TSYS processing platform solution for European-wide corporate credit cards for a major US-based bank. Jeff's experience further includes: working with a global leader in travel transaction processing and data intelligence to review operational systems and processes; defining the requirements and procurement process for telephone-switching facilities for the British Royal Household; he also developed, managed and implemented trading via EDI for the UK Foreign and Commonwealth Office. Jeff holds a BSc with Joint Honors in Computing and Electronics from the University of Durham, England, and an MBA from the Cranfield School of Management, England.
